DIEGO YONOFF MOLINA

IAM Analyst — Identity & Access Management

Barranquilla, Colombia (UTC-5) · Open to remote | diegojose0405@gmail.com | github.com/dieg0y | linkedin.com/in/diegoyonoff | dieg0y.github.io

PROFESSIONAL SUMMARY

Systems Engineering student specializing in Identity and Access Management, seeking a first remote IAM role. I study the identity lifecycle end to end — joiner/mover/leaver, RBAC, access reviews — through a self-authored 34-phase, 373-item roadmap with per-item exit criteria, backed by working code: JWT authentication services, IAM tooling, and an offline IAM study platform. Skills are evidence-labeled (hands-on / working knowledge / foundational); every claim traces to a repository or documented lab.

TECHNICAL SKILLS

IAM Core: RBAC & least privilege (hands-on) · Identity lifecycle JML · Access reviews · SoD · IGA concepts · Identity auditing & hygiene (working)

Microsoft Identity: Active Directory (hands-on, home lab) · Microsoft Entra ID · Graph API · PowerShell · MFA (working) · Conditional Access (foundational)

Identity Protocols: JWT issue & validation (hands-on) · OAuth 2.0 / OIDC · SSO & federation (working) · SAML · SCIM (foundational)

Identity Security / ITDR: KQL & log analysis, alert triage (hands-on, labs) · ITDR concepts · MITRE ATT&CK · SIEM concepts: Sentinel, Splunk (working)

Scripting & Systems: Python · TypeScript/React · Java/Spring Boot · Git (hands-on) · SQL · Linux/Windows admin · TCP/IP, DNS (working)

PROJECTS (PERSONAL & ACADEMIC — NO CLIENT WORK)

VaultNotes — Offline-first cybersecurity knowledge platform (Personal)

TypeScript · Next.js 16 · React 19 · Dexie/IndexedDB · Zod · PWA | github.com/dieg0y/VAULTNOTES

- Built an IAM pillar with 50 simulated identity tickets, 50 knowledge-base articles, 50 runbooks, and 30 troubleshooting guides around a 373-item, 34-phase IAM analyst roadmap (fundamentals → IGA, PAM, ITDR, cloud IAM, Zero Trust, GRC).
- Coded IAM tools in TypeScript: JWT decoder, SID/RID analyzer, LDAP DN parser, RBAC analyzer; documented 102 IAM attack techniques with incident case studies (Okta 2022, MGM 2023, Uber 2022). Offline ZIP backup with strict validation and DOMPurify sanitization.

plazoleta-usuarios — User authentication microservice (Academic)

Java · Spring Boot · Spring Security · JJWT · BCrypt · MySQL | github.com/dieg0y/plazoleta-usuarios

- Implemented JWT (HS256) issuance with user id, role, and email claims; stateless JwtAuthenticationFilter; BCrypt password hashing.
- Enforced role-based endpoint authorization (ADMINISTRADOR / PROPIETARIO / CLIENTE) in hexagonal architecture; a companion service validates the same tokens — cross-service trust in practice.

IPsubnetting — IPv4 subnet calculator CLI (Personal)

Python | github.com/dieg0y/IPsubnetting

- CLI tool for CIDR validation, subnet ranges, host counts, and binary mask breakdown, with layered architecture.

LABS & STRUCTURED STUDY (PERSONAL)

- IAM Analyst Roadmap: self-authored 34-phase / 373-item curriculum with exit criteria and per-item evidence tracking.
- AD Access Audit Lab (home lab): users, groups, and effective access reviewed against least privilege. Hack The Box SOC labs: brute-force, privilege escalation, lateral movement; Sysmon/Event Log analysis; MITRE ATT&CK mapping (complementary ITDR practice).

EXPERIENCE

Academic Tutor — Computer Logic & Programming Fundamentals

Universidad Simón Bolívar · 2024 – Present · Barranquilla, Colombia

- Tutor lower-semester Systems Engineering students in algorithm design, object-oriented logic, and data structures; guide Linux CLI, system administration, and network fundamentals labs.

EDUCATION

BSc Systems Engineering — 6th semester · Universidad Simón Bolívar · Barranquilla, Colombia

Coursework: computer networks, database architecture, operating systems, algorithm analysis.

CERTIFICATIONS & LANGUAGES

- Cambridge Linguaskill General — CEFR B2 (verified; average 172, Listening C1) · Microsoft SC-300 — Identity and Access Administrator — in progress · CompTIA Security+ (SY0-701) — in progress · Languages: Spanish (native), English

(B2).
